

QUALITY SINCE 1954

A Better Path. A Better Way.

How To:

Engage early with a Wickcraft, in person, by phone or email.

Develop the conceptual plan for your walkway's design, purpose and use.

Review layout drawings of your walkway done by Wickcraft.

Schedule fabrication 6 to 8 week in advance of desired delivery on site.

Install with Wickcraft's guidance and help from a local contractor or use your own resources.

Enjoy!

Building Your Wickcraft Walkway

An elevated walkway is a great way to introduce visitors to the most wonderful but sensitive areas while protecting each step and footprint along the way. We encourage you to connect, at no cost, with one of our project managers.

Whether you are Landscape Architect or a property manager, there are several ways our experience can be of great help to you.

- ✓ Wickcraft can assist you to create the project plan and budget. This conceptual plan not only outlines the length and width of the walkway. It also considers load requirements, environmental impact, safety and ADA issues as well as approvals and permitting requirements.
- ✓ Once the plan and budget has been approved, a binding quote is issued and fabrication is scheduled. Fabrication can take 6 to 8 weeks.
- ✓ Wickcraft produces, and provides to you, a set of engineered layout drawings with each walkway section numbered.
- ✓ When completed, the walkway is shipped to the job site where your resources unload and stage for installation. *See Installation Checklist.*
- ✓ Each section (frame and deck) are numbered and corresponds to the layout drawings provided. Installation is both sequential and directional.
- ✓ Your Wickcraft project manager will work with site resources to help coordinate delivery and ensure a smooth install.
- ✓ If desired, an onsite Wickcraft installation manager can be scheduled to assistance on site resources.
- ✓ Wickcraft workmanship is guaranteed for your enjoyment.
