

QUALITY SINCE 1954

A Better Path. A Better Way.

Why Wickcraft:

Guaranteed for life, quality workmanship has been guaranteed for life since 1954.

Pre-fabrication means quality is created and controlled in a shop and delivered in the field.

Modular design lowers installation costs due to high rate of install.

Galvanized Steel frames last four times as long as wood structures.

Non-penetrating legs are adjustable and require no boring.

Non-combustible for fire prone areas.

Specifying a Wickcraft Boardwalk

A successful project is a result of thoughtful planning from start to finish and The Wickcraft Company has you covered each step of the way. To ensure your project includes the quality and specifications you demand, include the language below in your bid package.

- ✓ All **frames** must meet or exceed International Building Code requirements of 100psf load capacity.
- ✓ All **decking** must meet or exceed International Building Code requirements of 100psf load capacity supported by frame structure.
- ✓ Walkway frame are to be fabricated with ASTM A500 Structural Steel.
- ✓ All frame connecting plates to be fabricated from 1/4" A36 Structural Steel and are laser cut for precision quality.
- ✓ All frame connecting pins to be fabricated from 1/4" A36 Structural Steel.
- ✓ Legs are fabricated from ASTM A500 Structural Steel Tubing.
- ✓ Entire post fabrication frame assembly is hot dipped galvanized with a minimum of 3.9 micron thickness of zinc based galvanizing.
- ✓ All post galvanized frame assemblies are hand rasped and cleaned removing any sharp edges without compromising the galvanized integrity.
- ✓ If post pockets are added for a hand railing, 7 Gauge Plate Steel is used.
- ✓ If used, all decking is Arsenic Free Western Wood structural lumber.

Remember that each project is different so be sure to consult with your Wickcraft project manager for additional specifications with respect to, and appropriate for your project.
