

QUALITY SINCE 1954

A Better Path. A Better Way.

## Highlights:

**Delivery** should be scheduled when resources and space is available

**Unloading** will require a forklift with 6ø forks.

**Staging** of frames and decks should be done to facilitate sequential retrieval.

**Assemble** frames in sequential starting at 0S1ö on the provided layout drawing.

**Adjustments** can be made along the way with the adjustable legs or by pulling in the desired direction.

## Walkway Installation Checklist

A successful project is a result of thoughtful planning from start to finish and The Wickcraft Company has you covered each step of the way. The following is an overview of the key points to consider as you begin the installation of your Wickcraft walkway.

- ✓ There are four types of sections; Standard, Start/End, Custom, and Transition. All but standard sections are numbered as per the layout drawing and your install should start with section 0S1ö.
- ✓ When unloading materials, stack according to type of section with highest numbered at the bottom, as these will be the last to be installed.
- ✓ Starting with frame 0S1ö and working in the direction of install, position and level. Subsequent sections are installed by hinging together with the 0Posi-Locö system. For sections without the Posi-Loc hinge (Transition sections) use the provided through bolts and nut.
- ✓ On each frame, insert leg into leg-sleeve to the approximate desired height and tighten slightly. Hinge and lower section on to bearing pad (if being used). Level by adjusting leg height. Leave excess leg length above frame.
- ✓ Once all frames are installed and walkway is leveled (a laser or string line may be helpful), fasten the legs with self-tapping screws and trim leg length.
- ✓ Position corresponding deck sections on frames. Make sure the deck is square in the frame and while applying downward pressure install self-tapping deck screws one in each corner. A Pilot hole may be helpful.
- ✓ Attach continuous curb-rail if appropriate.
- ✓ Install handrail if appropriate and according to handrail specific instructions.
